NASA ENVIRONMENTAL TRACKING SYSTEM (NETS)

Joe Homan - NCI

Bella Fallner - NCI

Bob Purgason - NCI

Charles Maynard - NCI

NETS has allowed NASA To

- Improve the quality of environmental information through single source data entry, standardized data, and adherence to specific validation criteria.

- Reduce staff time required to generate mandatory Agency-level reports by over 50 percent.

- Enhance Agency-Wide environmental management through improved access to performance data that identifies trends, problem areas, and improvement opportunities

NETS History and Future

- NETS has been in Production since 1997
- Currently supporting 250 + users at 14 NASA centers
- wNETS currently supports Archeological, NEPA, Recycling and Waste and Energy
- wNETS soon to support Pollution Prevention and Environmental Functional Management.

NETS – Customer Response

- Selected for a Group Award for the NASA Agency Honor Awards for 2002.

- Selected as an IT Best Practice Success Story by the NASA HQ Chief Information Office for 2001.

- Nominated by NASA HQ for the 2001 Government Technology Leadership Awards and selected as one of 30 finalists.

- The Environmental Protection Agency regards NETS as a model for Federal agency environmental reporting systems.
